## Kratki ALTA freestanding on ledge

When installing the Kratki ALTA as a freestanding unit exposed on a ledge, we recommend also ordering the **ALTA FS Top Cover**. This 4mm thick steel plate neatly finishes the top surface of the convection box, creating a cleaner, more refined appearance (see photos below).

The yellow arrows show where the two metal spacers (provided) should be placed.

Place the **FS Top Cover** resting flat on the 2 spacers and the 4 front frame square bolts
